MINI PROJECT REPORT

ON

LOST AND FOUND WEB APPLICATION

Submitted for partial fulfillment of Bachelor Engineering

By

1.Kavyashree B S (1SI16CS049)

2.Rakshitha N (1SI16CS080)

Under the guidance of

Dr. Nirmala M B B Tech, M Tech, Ph D

Associate professor

Department of Computer Science & Engineering

Siddaganga Institute of Technology, Tumakuru-572103

(An Autonomous Institute affiliated to VTU, Belagavi & Recognized by AICTE, New Delhi)

2018-2019

SIDDAGANGA INSTITUTE OF TECHNOLOGY, Tumakuru-3

(An Autonomous Institute affiliated to VTU, Belagavi & Recognized by AICTE, New Delhi)

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

CERTIFICATE

This is to certify that the mini project entitled "Lost and found web application" is a bonafide work carried out by **KAVYASHREE. B. S (1SI16CS049), RAKSHITHA. N (1SI16CS080)** of VI semester **Computer Science and Engineering, SIDDAGANGA INSTITUTE OF TECHNOLOGY** for the partial fulfilment of bachelor of Engineering during the academic year 2018-2019.

_____   _____

Signature of the Guide   **Signature of the Convener**

Dr. Nirmala M B B Tech, M Tech, Ph D   A.V. Krishna Mohan B.E, M.E.

Associate professor   Assistant Professor

_____

Signature of the HOD

Dr. R Sumathi B.E, M.E, Ph D

Prof and head, Dept. of CSE

Name of the Examiners: **Signature with Date**

1.

2.

ACKNOWLEDGEMENT

We consider this as a privilege to express a few words of gratitude to all those who guide and inspired us for the successful completion of our project work.

We are thankful to god for giving us an opportunity to associate ourselves with an esteemed personality like his Holiness Dr. Sree Sree Sivakumara swamigalu and Sree Sree Siddalinga Swamiji, who has been a great inspirational and guidance to all of us.

We express our guidance to our respected Director Dr. M. N. Channabasappa for his constant support in fulfilling our endeavors.

We would also like to thank our respected Principal Dr. K.P. Shivanand for providing us with various facilities for carrying out this project.

We are also thankful to Dr. R. Sumathi, Proffessor and Head, Department of computer science and engineering for giving us all the freedom, inspiration and encouragement to carry out this project successfully.

We thank our project guide Dr. Nirmala M B, Associate Professor, Department of Computer Science and Engineering for providing the critical support on every step of this project development. Her guidance gave us the environment to enhance our knowledge, skills and to reach the pinhole with sheer determination, dedication and hard work. Without her aspiring support this project would not have been implemented.

We thank our project coordinator Mr. A. V. Krishna Mohan, Assistant Professor, Department of computer science and engineering for allowing us to take up this idea as our mini project.

Lastly, we thank our anonymous reviewers for their insights. We are also immensely grateful to them for their comments during the development of project.

Any errors are our own and should not tarnish the reputation of these esteemed persons.

ABSTRACT

In computing, a web application or web app is a client–server software application which the client or user runs in a web browser. Web applications are getting popular these days as they can be accessed from anywhere using a web browser and the convenience of using a web browser as a client to update and maintain web applications without distributing and installing software. In this project, a web-based distributed lost-and-found service for SIT students is designed and implemented. The major goal of this project is to help the students around the campus with a web service to find their lost stuff more quickly.

When people lose their items, it becomes very difficult to get their items back, this project help those people to solve their problem. There are many situations where they won't know where they have lost and when they have lost, using this web server they can easily find out with whom it is there and can go and collect.

The main target of this project in this regard is to propose a single place to resort to for reporting such cases. With a single web site for reporting lost items, no matter the location within college, users would be able to just report an item as missing and can collect it from the person who found the items.

The application is an online lost and found web portal with an interactive user interface. It is a user-friendly web application which is created using web programming languages connected to the database. The project is designed using a client-server model. The main features of the web application include an authentication, registration and login system, a lost and found listings page where the user can enter the information about the lost and found items.
